Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Claims 47-57 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim.

Election was made **without** traverse in Paper No. 10.

Information Disclosure Statement

2. The information disclosure statement filed 10/09/02 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each U.S. and foreign patent; each publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Specification

3. The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3724

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 58-63 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hartbauer et al. in view of Morizzo.

Hartbauer discloses (Fig. 1-12) the invention substantially as claimed including a chassis 10, a detection system (42, 104 and 106) responsive to an absence of paper in the lower roll, as seen in figure 12, a transfer mechanism having a transfer bar 118 and a transfer link 124; an actuator 28A and a spring 126. Hartbauer does not show a control means and a motor. However, Morizzo teaches the use of a control means 108 and a motor (see col. 13, line 5-6) for the purpose of obtaining automatically controls all apparatus operations. It would have been obvious to one having ordinary skill in the art at the time the invention was made to have modified Hartbauer's device by providing the control means and the motor as taught by Morizzo in order to obtain device that automatically controls all apparatus operations reducing the waste material.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Hedge et al., Perrin et al., Hankinson, Collins, Boone et al., Johnson et al., Haen et al., Menna and Denen et al. are cited to show related device.
